

PRODUCT CATALOG / 2015

Nearly 13 years ago, John, Jeff, Gretchen and Stephanie Overstreet made the decision to establish CMMG. Since that time, things have continued to get better and better. Although the nature of our business continues to evolve, one thing does not—our commitment to meet each and every morning to pray for God’s wisdom in managing the enormous responsibility that comes with this business. By His grace, we have grown every year!

CMMG is constantly looking for new ways to improve our products, processes and company at large. Both our customer service and product lineup continue to be second to none, and all of our rifles and firearms parts are made in the United States from the best materials available.

CMMG guarantees its products against defects in material or workmanship for the life of the product. CMMG Inc. will repair, replace or substitute any product(s) if a defect in material or workmanship is found.

Mk47 MUTANT

THE BIRTH OF A NEW AR

This is no hybrid AR15. The beast-like Mk47 MUTANT is instead spawn from two of the world's greatest platforms, genetically re-engineered for AR15 accuracy and relentless AK-47-like reliability with the legendary 7.62x39mm caliber.

The inner beauty to the unorthodox appearance of the Mk47 lower receiver is that it not only readily accepts standard AK magazines—it does so without the bulk and weight of a typical AR magazine well. The upper and bolt carrier group are perfectly matched, providing the dimensions and strength needed to manage the 7.62x39mm caliber without unnecessary weight.

What is not an anomaly, however, is the versatility that is embedded in the Mk47 MUTANT's AR bloodlines. The CMMG Mk47 is ready to accept your favorite AR furniture and accessories.

AR ACCURACY WITH THE 7.62x39mm

The Mk47 sports a 16.1" free floated barrel with a 1:10 twist and runs on the proven carbine-length direct impingement gas system. By effectively maximizing the accuracy and harnessing the knockdown power of the 7.62x39mm, the Mk47 is an ideal rifle for a variety of sporting and defense applications.

FULLY CUSTOMIZABLE

The Mk47 MUTANT is fully modular, and like any other AR-platform rifle, the Mk47 is ready to accept your favorite furniture and accessory choices.

ERGONOMICS

Shooters will enjoy familiar fire control location as well as a wide range of adjustability to fit a variety of body types and sizes.

INTERCHANGEABLE PARTS

Trigger assembly, rail, grip, buffer tube assembly, butt stock, muzzle brake and gas system enjoy full interchangeability with mil-spec AR15 and CMMG Mk3/AR10 parts. (Excluding Armalite)

A UNIQUELY DESIGNED RECEIVERS

Weighing in at only 7.2 lbs,* the Mk47 MUTANT features uniquely engineered upper and lower receivers. Expertly crafted from 7075-T6 billet aluminum, this new design reduces weight yet deftly manages the dimensions and pressures of the 7.62x39mm tapered cartridge.

B SHORT, STURDY BOLT CARRIER GROUP

Not only are the upper and lower unique to this platform, the Mk47 bolt carrier group is derived from the massive 7.62/.308 AR10 bolt carrier group so it's MUTANT strong. CMMG kept all of the material on the bolt intact for added durability and strength.

**Mk47 AKM Model, 7.6 lbs with included magazine.*

C ACCEPTS STANDARD AK MAGAZINES

The lower receiver is designed to accept standard AK magazines, which are widely available, inexpensive, and extremely reliable. A standard ambidextrous hook and latch system makes reloading fast and intuitive. Mk47 comes with one Magpul PMAG® 30-round AK/AKM MOE® 7.62x39mm Magazine.

D OPTICS READY, ACCESSORY COMPATIBLE

A full-length Picatinny rail runs atop the Mk47, making it easy to mount your preferred sights or optics. CMMG's RKM KeyMod™ Hand Guard is exceptionally light and ergonomic. It also gives users the freedom to mount a wide array of accessories using the KeyMod slots found in the 3, 6 and 9 o'clock positions. For accessories that are not yet KeyMod compatible, CMMG offers 5-slot accessory rails.

E CMMG SV BRAKE

CMMG's SV Brake helps temper recoil and reduce muzzle rise to speed up target acquisition on follow up shots and improve the overall shooting experience.

Mk47 AKM

PN: 76AFCD7
CALIBER CHOICES: 7.62x39mm

The all new Mk47 AKM offers the best balance of features and cost giving you the best value in the MUTANT lineup. Combining the accuracy and modularity of the AR-15 with the reliability of the AK47, the Mk47 AKM is a great all around rifle. The Mk47 AKM features all new mid-sized receivers based on our Mk3 platform carved from billet 7075-T6 aluminum. The Mk47 AKM was designed to harness the power and reliability of the 7.62x39 cartridge utilizing a robust bolt also based off our Mk3. The unique Mk47 lower receiver readily accepts standard AK Magazines. This model comes equipped with a MOE pistol grip, CTR butt stock, SV muzzle brake, 30rd AKM PMAG, and CMMG's lifetime quality guarantee.

Mk4

PN: 55A9C6D
CALIBER CHOICES: 5.56X45mm

The Mk4 rifle is where it all started at CMMG. The 14.5" 4150 CrMoV chrome lined barrel is built to the exact specifications as the barrels used in the military's M4 Carbines. The extended A2 compensator is permanently attached in order to meet minimum length requirements. The complete rifle includes Magpul's MBUS rear sight and one 30-round PMAG. Like all CMMG products, it features our lifetime quality guarantee.

BARREL: 14.5" M4, CHROME LINED, 1:7" TWIST

Mk4LE

PN: 55AE160
CALIBER CHOICES: 5.56X45mm, 300 BLK, 22LR

Our basic rifle, the Mk4LE, is available in 5.56x45mm, 300 AAC BLK, and 22LR. All models feature a nitrided 16" 4140 CrMo steel M4 profile barrel except the 300 BLK, includes M300 multi-role profile. Each rifle comes topped off with an "F" marked front sight base and MBUS rear sight. Like all CMMG products, it features our lifetime quality guarantee. A 9mm version of this rifle, called the MK9 LE, can be found on page 11.

BARREL: 16.1" M4, 1:7" TWIST (1:7" 300BLK, 1:16" 22LR)

Mk4LEM

PN: 55AC749
CALIBER CHOICES: 5.56X45mm

Similar in configuration to our Mk4LE, except for the mid-length barrel and hand guard, the Mk4LEM features a nitrided 16" 4140 CrMo steel 5.56x45mm barrel with our mid-length medium taper profile. The mid-length gas system offers a longer sight radius and smoother operation. The medium taper profile optimizes the strength of the barrel while reducing and repositioning the weight for a handy, maneuverable rifle.

Mk4 A4

PN: 55A21A6
CALIBER CHOICES: 5.56X45mm, 22LR

This classic AR15 configuration is based on the M16A4 and is available in both 5.56x45mm NATO and 22LR. The rifle's defining characteristic is its 20" government profile barrel. The 5.56mm barrel is 4150 CrMoV chrome-lined and built to the military's stringent specifications, while the 22LR features a premium 4140 CrMo steel barrel with a nitride finish for years of accurate and reliable performance. Both the 5.56mm and 22LR versions include an MBUS rear sight, a magazine and CMMG's lifetime quality guarantee.

RKM HAND GUARDS

The RKM family of hand guards are lightweight, modular, free-floating and utilize the KeyMod attachment system. Available for both Mk4/AR15 rifles and our Mk3 rifles, they are available in 7", 9", 11", and 14" lengths for the Mk4/AR15 and in 11" and 15" lengths for the Mk3. The KeyMod system is the new industry standard, being a simple, low profile, and comfortable mounting alternative to M1913 Picatinny rails. The standardization of the system allows for direct attachment of accessories without the use of intermediate M1913 rails.

Made of extruded 6061-T6 aluminum and utilizing a simple and robust clamp attachment system, the KeyMod makes for a solid, yet easy installation. KeyMod attachment slots run the length of the hand guard at the 3, 6, and 9 o'clock positions. Along the top of the hand guard is a standard M1913 Picatinny rail. The Mk4/AR15 versions include a QD swivel socket on each side of the hand guard.

The muzzle threads on CMMG's barrels are made to the highest industry standards. The 5.56x45mm barrels feature the mil-spec 1/2"-28 threads. The 22LR features a .400" long 1/2"-28 muzzle thread length to accommodate most rimfire silencers. The 300 BLK and 308 WIN barrels use the standard 5/8"-24 thread for .30 Cal barrels, while the 9mm barrels use Colt standard 1/2"-36 threads.

CMMG has both barrel assemblies and barrel sub-assemblies available as replacement parts and for assembling your own custom upper. A barrel sub-assembly includes a properly headspaced and pinned barrel extension, drilled gas port and gas block divot. The barrel assemblies include the same, along with a standard barrel nut, hand guard cap and pinned front sight base assembly.

CMMG offers a wide selection of different barrel profiles and lengths:

M4 PROFILE

A mil-spec contour, the profile is turned down under the hand guard, featuring a .750" diameter gas block journal and includes the iconic M203 grenade launcher cut.

MEDIUM TAPER

A tapered contour, designed to optimize strength versus weight, this profile uses a .750" diameter gas block journal. The stainless steel models have a 1" long journal while the chrome moly models feature the standard 1.89" long journal.

HEAVY TAPER

This contour is made with accuracy in mind above all else and features a .936" diameter gas block journal and slight taper.

MULTI ROLE

A medium weight contour, our multi role profiles, like the M300, are designed to be the most configurable barrel possible. They have extended and multiple .750" diameter gas block journal locations.

UPPER RECEIVERS

CMMG's Mk4/Mk9 upper receivers are made from a 7075-T6 aluminum forging, and machined to fit all mil-spec upper receiver components and bolt carriers. Offered both stripped or assembled, these uppers are ready for a barrel assembly. CMMG has what you need for your next upper build. CMMG also has a Mk3 upper kit available; the upper receiver kit includes the upper receiver, ejection port cover and hardware, and a Mk3 charging handle. The Mk3 upper receiver kit is a perfect match for your CMMG Mk3 lower receiver.

Along with a full complement of upper receivers and parts, CMMG also produces a full line of parts to finish building the rest of your upper group. Bolts and carriers, hand guards, barrel nuts and charging handles are just a few of the quality, U.S. made parts available at cmmginc.com.

MUZZLE DEVICES

SV Muzzle Brake

The CMMG SV Muzzle Brake is designed to reduce recoil and muzzle rise to allow quick follow up shots.

Vortex Striker

The Vortex Striker flash hider is a collaboration between CMMG and Smith Enterprises. It adds carbide strikers as a glass breaker and standoff device to the standard Vortex Flash hider.

P90 Flash Hider

The CMMG P90 flash hider is used in conjunction with a 10.3" barrel to complete a short barrel conversion of a PS90 and works to effectively reduce the muzzle flash. Threaded M12x1 LH.

LOWER RECEIVER GROUPS

Lower receivers are offered in two major configurations: lower groups and stripped lower receivers. Lower groups include the entire lower half of the rifle. CMMG offers these configurations for the Mk4, Mk9 and Mk3. The Mk4 and Mk9 lower receivers are made from a 7075-T6 aluminum forging while the Mk3 lower receivers are made from a solid billet of 6061-T6 aluminum. Please contact your local FFL dealer to order a CMMG lower receiver.

LOWER PARTS KITS

CMMG's lower parts kits are available for both standard Mk4/AR15-type lowers and Mk3/LR308-type lowers. Made up of the highest quality mil-spec parts, CMMG's lower parts kits include the best mil-spec type trigger in the industry. The Gunbuilder's Lower Parts Kits are perfect for those looking to assemble their new custom lower: just add your favorite aftermarket trigger, pistol grip, and trigger guard. Be sure to visit cmmginc.com to see the complete offering of LPKs.

22LR CONVERSION KITS

There's no substitute for trigger time when training with AR15s, and with a CMMG 22LR Conversion Kit you can train longer for pennies on the dollar. The conversion bolt takes only seconds to install and is fully serviceable. Reliability and ease of cleaning have been enhanced due to full stainless steel construction. Available at cmmginc.com.

BRAVO KIT

PN: 22BA6E1
MSRP \$229.95

Includes these features:

- Stainless steel construction
- Brass extension bushing
- Proven GRAY 25rd Magazine

ECHO KIT

PN: 22BA64E
MSRP \$279.95

The Bravo Kit, plus these features:

- Forward assist adaptor
- Anti-jam charging handle
- Cleaning jag/guide rod

GRAY MAG

PN: 22AFC25
MSRP \$24.95

- Also available in a 10rd Version

PROVISIONS

CMMG continues to maintain its unique line of t-shirts, stickers, tac-snacs, tactical bacon and water bottles. To view or place an order for any of these items, please visit cmmginc.com.
